

YAMAHA

Karaoke Speakers

KMS-910/KMS-710

NEW PRODUCT BULLETIN

Yamaha's long experience in audio and acoustic technology has created these extra-high performance karaoke speakers with beautiful tone quality in the mid and high ranges.

KMS-910

KMS-910

- Yamaha's highly advanced speaker technology ensures the highest levels of sound quality and long-term reliability
- Specially developed for best performance in the vocal range
- 450W high power handling capacity
- Dual bass reflex ports
- 90dB sensitivity
- Pro studio design with durable body

KMS-710

- Yamaha's highly advanced speaker technology ensures the highest levels of sound quality and long-term reliability
- Specially developed for best performance in the vocal range
- 240W power handling capacity is high in this class
- Dual bass reflex ports
- 90dB sensitivity
- Pro studio design with durable body

KMS-710

Magnificent Sound Quality

Yamaha Experience and Technology

Yamaha is the world's top maker of musical instruments and our acoustic technology is so advanced, we even design concert halls. We are also a leading manufacturer of professional audio equipment. Yamaha mixing consoles and amplifiers are used in many of the world's top music clubs, concert halls and recording studios. We have been making speakers for decades, and have created many legendary models, including the NS-1000M and NS-10M. All of this technological expertise and experience has contributed to achieving the high-performance capabilities of the KMS-910 and KMS-710.

High Quality Sound Developed for Karaoke

Yamaha's main concept behind the development of these Karaoke speakers is that "human ears are most sensitive to the human voice." We therefore concentrated on achieving speakers that sound good for singers, with emphasis on the mid frequency range for vocals, including the higher ranges for female

vocals. They are designed to deliver excellent response, minimal coloration and low distortion, for high quality, reliable sound output.

The woofer cones are made of soft and light paper produced in Japan, and are perfect for karaoke sound. The woofer surrounds are also made with karaoke in mind, being light and easily movable. Compared to previous speakers, the magnetic circuit is more powerful, enabling realization of the above-mentioned excellent response, minimal coloration and low distortion.

Dual Bass Reflex Ports

Another feature that improves sound output for singing voices is the Dual Bass Reflex Ports.

Professional Design

Pro Studio-Type Design, Durable Body

Like all of Yamaha's professional equipment, the design is clean, simple and easy to use. Both models are built for extreme durability and reliability, assuring high quality performance for many years.

Main Specifications	KMS-910	KMS-710
Type	2-way bass-reflex	2-way bass-reflex
Woofer	25cm cone	20cm cone
Tweeter	7.7cm cone	7.7cm cone
Magnetic Shielding	■	■
Frequency Response	55 Hz–20 kHz	60 Hz–20 kHz
Nominal Input Power	150 W	80 W
Maximum Input Power	450 W	240 W
Sensitivity	90 dB/2.83 V/1 m	90 dB/2.83 V/1 m
Crossover Frequency	2.5 kHz / 15 kHz	2.6 kHz / 15 kHz
Impedance	8 ohms	8 ohms
Dimensions (W x H x D)	501 x 320 x 318 mm	452 x 259 x 284 mm
Weight	12.2 kg/unit	8 kg/unit

Note: The useful life of the speaker surround depends on usage conditions and environment (especially ultraviolet radiation exposure and humidity), etc.
